

CSS Mega Menu

This is a set of 2 CSS Mega extensions with a slightly different behavior and appearance. Each extension implements a responsive navigation bar with multi-column drop-down menu, optimized for desktop computers and mobile (touch) devices. On desktop computer, the menu will display a drop-down menu with multiple columns and on mobile devices it will display a single column. It uses CSS only (no JavaScript!).

Online Demo

General Properties

Add, edit and remove menu items. Each item can have a title, link and icon.

Tips:

- If the button only has 1 sub item then it will not show the drop-down menu. Instead the button will be used as link.
- Buttons can have a different number of columns for the drop-down menu.
- It's possible to insert a divider between menu items. In that case, enter "---" (3 dashes) in the text field.

Style Properties

Font

Font is the font family of text, such as Arial and Times New Roman.

Style

Style of the font such as Bold, Italic or Regular.

Alignment

Specifies the alignment of the menu.

Icon Offset

Specifies the offset of the Font Awesome icon from the text.

Arrow offset

Specifies the offset to the arrow from the text.

Breakpoint

Specifies the width where the menu will switch from desktop (multi-columns) to mobile (single column) mode.

Transition

Specifies the timing and duration of the underline transition.

How to install this extension so it is available in WYSIWYG Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

Requirements

WYSIWYG Web Builder 16.1 or higher
