

Drawer Menu

This extension implements an expandable drawer menu with many styling options. The main button expands or collapses a dropdown menu with linkable text and icons. Each item can have a different icon color, which may be useful for example if you want to use it as a social link menu.

The drawer menu has support icon libraries, like Font Awesome, Material Icons, Open Iconic, IonIcons etc. <https://wysiwygwebbuilder.com/iconfonts.html>
Icons can also be published as embedded SVG to keep the page weight low.

In addition to responsive font-sizes, the column property is also responsive, which means that you can have different number of columns in breakpoints.

Position

The drawer menu can be fixed at the top, at the bottom or used as inline menu.

Text (open / close)

Specifies the button text for the expand and collapsed state.

Icon (open / close)

Specifies the button icon for the expand and collapsed state.

Alignment

Specifies the alignment of the button relative to the 'drawer'.

Use 'stretch' to make the button the same width as the drop-down menu.

Columns

Specifies the number of link columns. The number of columns is responsive and can be different in breakpoints.

Maximum Width

Specifies the maximum width of the drop-down menu. If this is empty then the drop-down menu will be full width of its container.

Icon Size

Specifies the icon size. This value is responsive and can be different in breakpoints.

Styling

The menu has many styling options like text, background, border, padding, spacing etc.
