

Nested Fullscreen Menu

The Nested Fullscreen Menu is an animated multi-level menu (main + sub items) inspired by a codepen by Rafaela Lucas (<https://codepen.io/rafaelavlucas/pen/JjPGNdq>).

The menu is triggered by a hamburger icon. Main menu items can have a different color. Sub items use the same color as their parent.

The menu has support icon libraries (WWB16.1+), like Font Awesome, Material Icons, IonIcons etc. <https://wysiwygwebbuilder.com/iconfonts.html>
Icons can also be published as embedded SVG to keep the page weight low.

Breakpoint

The breakpoint value specifies when the menu switch from column to row mode for mobile devices.

Notes:

If an item has sub menus then the item itself should not have a link, because otherwise the sub menu will never be displayed.

The menu editor is a generic dialog. So, although you can add multiple sub levels, only one level is supported by the menu.
